CALU

About our University

Did you know?

At California University of Pennsylvania, students are our first priority. We're here to facilitate learning and encourage discovery. Not just

in the classroom, but through day-to-day experiences. We're here to foster friendships and to create self-confidence. To build the foundation you need for a successful career, based on your individual dreams. As a medium-sized community of 7,419 undergraduate students and 1,981 graduate students, we're small enough to feel like a family, but large enough to offer variety and diversity. We're here to help you become the individual you've always dreamed of being. As a result, our students not only graduate with a diploma, but with a degree of character as well.

Quality and affordability

As a proud member of the Pennsylvania State System of Higher Education, Cal U offers students a private-school experience at a public-school price. A vast array of grants, loans, scholarships and work-study programs are available from federal, state and University sources. Financial aid is based on a variety of factors, including academic achievement and financial need. Our Financial Aid Office can help you through the process.

Courses that become you

Cal U offers **more than 150 programs of study** in three undergraduate colleges, as well as 50 graduate programs. There is an academic program that is perfect for you, and a proven method to help you graduate in four years. Whether you're interested in using robotic technology in the field of engineering or helping to shape the future as an early childhood educator, you'll find what you're looking for at Cal U.

Small town near a big city

Located on the banks of the Monongahela River just 35 miles from downtown Pittsburgh, Cal U offers students a beautiful, safe learning environment. Our 98-acre main campus is the focus of academic life, while our 196-acre south campus features athletic fields and picnic areas, as well as student housing.

“I chose Cal because it was a perfect fit for me. There is a lot to do around campus, and it's easy to get involved. My classes are challenging and there are plenty of people who care about me and my success. I couldn't imagine going anywhere else.”

JOSEPHINE WAH
MAJOR: SOCIAL WORK

CAL U IS HOME TO MORE THAN **250** CLUBS AND ORGANIZATIONS Including **16** NCAA Division II Teams

The scenic Pennsylvania countryside is ideal for hiking, biking, rafting, skiing or horseback riding. Big name retail stores are just minutes away — and so are numerous antique shops and specialty stores.

The city of Pittsburgh not only offers diverse cultural experiences, professional sporting events and lively restaurants, but also serves as a vital connection to internships and a dynamic business community.

Professors who care

Cal U's faculty includes nearly 300 full-time professors — more than 80 percent of them have Ph.D.s or the highest degree in their field. They are Fulbright scholars, recipients of prestigious grants, presenters at national and international conferences, and acclaimed experts in their fields. But, at the end of the day, their main reason for coming to work is to pursue their passion to teach, to motivate and to inspire students. **With a student/faculty ratio of 19:1**, their hands-on approach will change the way you think about learning.

High-tech facilities

Cal U is growing — with new buildings that enhance your overall experience. Duda Hall and the Eberly Science and Technology Center are among the buildings that offer high-tech classrooms and a student-friendly environment. Learn volumes at the Manderino Library, including how to access electronic books and find credible material on the Internet. Enjoy a performance at Steele Hall Mainstage Theatre, **one of the finest theater facilities in the state** of Pennsylvania.

Get real

When our core values of **integrity, civility, and responsibility** are coupled with real-world training, we see a big difference in the type of jobs our graduates land.

So **nearly all of our students gain real-world, hands-on experience** in their fields — whether it's through job shadowing, internships or cooperative education.

Welcome home

Cal U's student housing is among the best in the nation.

Students come from all 50 states, D.C. and 36 different countries. Our six

coed residence halls offer smoke-free housing for 1,496 students on the main campus. Vulcan Village, our garden-style apartment complex on the south campus, accommodates 768 students. **All units feature air conditioning, carpeting, free local telephone service, cable TV and high-speed Internet.** Most students share a bathroom with only one other person and never more than three others.
